Fugarok, the easy and quick solution.

Fugarok develops a semi-fluid rheology for extended-workability, guaranteeing fill joints fully and leave the surface easy to clean, whatever the conditions.

→ **Prolonged workability**

Fugarok develops a semi-fluid paste that is easy to apply and has a long workability, whatever the building site conditions.

It maintains a compact and workable mixture without the need for additions of water and re-mixing.

→ **Ultra-cleanable, full joints**

Fugarok can also be easily cleaned from structured tiles and natural stone.

Thanks to its high filling power, it guarantees total filling of the joint and no shrinkage.

→ **Calibrated granulometric curve**

Thanks to its innovative mixture of aggregates with a selected granulometric curve, the finish is compact and uniform.

→ **High mechanical resistance**

Thanks to its specific, hygroprotected formulation, Fugarok guarantees high resistance to abrasion and atmospheric agents as well as insensitivity to frost, even in the most extreme conditions.
