Aquaform OD - OD Plus

High quality ASA perimeter drain with seamless wall-floor sides coated in non-woven polypropylene to guarantee a good seal with Aquastop Nanoflex mineral membrane, using Aquastop Fix sealant and gel adhesives from the H40 range.

Aquaform OD: entrance hole Ø 55 mm, exit hole Ø 45 mm, length 400 mm.
Aquaform OD Plus: entrance hole 90x90 mm, exit hole 75x75 mm, length 460 mm.

1. **UV resistant**
2. **Paintable**
3. **High resistance to collision**

kerakoll

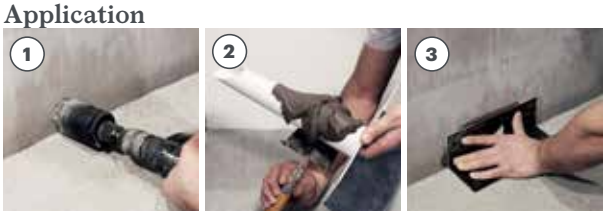

Areas of application

→ Intended use:
Balconies, terraces, flat roofs and external horizontal surfaces of any size.

Creation of perimeter drains in Kerakoll waterproofing systems.

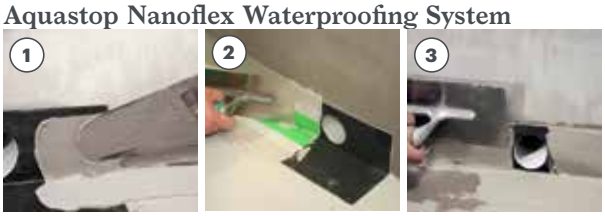

Instructions for use

→ Application

(1) Drill a hole diameter 60 mm in the wall close to the floor/parapet joint. In Aquastop Nanoflex and Aquastop Flex waterproofing systems, make a suitable housing on the screed to guarantee the drain is perfectly level with the floor, and avoid counter-slopes in the floor near the water exit hole.
(2) Use Keralevel LR for the provisional fastening and the filling: apply the levelling product to the Aquaform OD outlet pipe and to any housing formed in the screed.
(3) Insert Aquaform OD in the hole made as described above, and remove any excess Keralevel LR. Level Aquaform OD on the wall and floor (to ensure perfect levelling of the wall, mechanically chip out a suitable housing in which to position the drain).

→ Aquastop Nanoflex Waterproofing System

(1) Once the Aquaform OD drain has been fixed, apply Aquastop Nanoflex or Aquastop Flex on the fabric connection surfaces of the drain and on the support surfaces adjacent to the drain.
(2) Fix Aquastop 120 or Aquastop Plus 120 on the fresh waterproofing product following the wall-floor joint. Press firmly and smooth over to ensure the tape adheres perfectly, being careful not to wrinkle it.
(3) When laying Aquastop Nanoflex or Aquastop Flex, cover the Aquastop 120 or Aquastop Plus 120 carefully.

→ Green Pro Waterproofing System

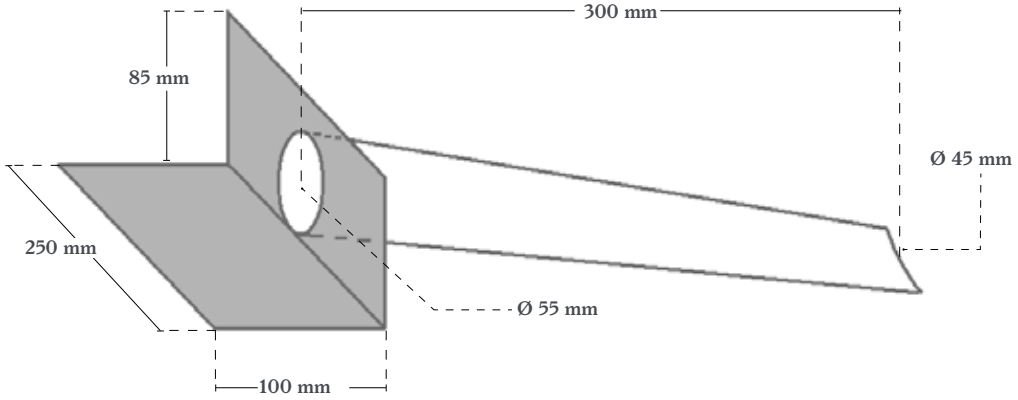

(1) Lay Aquastop Fix on the black TNT connection surfaces of the Aquaform drains and on the adjacent surfaces to be connected, taking care to fill in the Green Pro surface cavities.
(2) Position the special pieces of Aquastop 120 or Aquastop Plus 120 cut to measure.
(3) Press firmly and smooth over to ensure the tape seals perfectly, being careful not to wrinkle it. If necessary, use several pieces of tape until the drain has been completely sealed (black TNT totally covered).

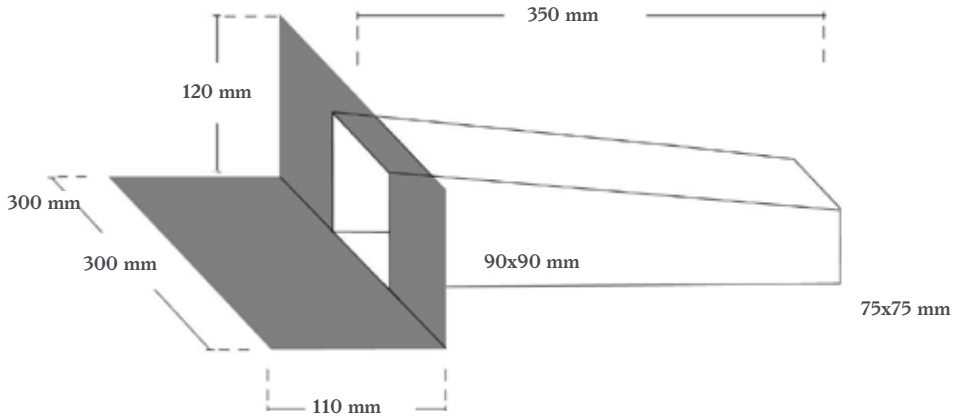

Technical Data compliant with Kerakoll Quality Standard		
	Aquaform OD	Aquaform OD Plus
Material	ASA	ASA
Colour	grey	grey
Connector height	≈ 85 mm	≈ 120 mm
Connector width	≈ 250 mm	≈ 300 mm
Total length	≈ 400 mm	≈ 460 mm
Inlet	Ø ≈ 55 mm	≈ 90x90 mm
Outlet	Ø ≈ 45 mm	≈ 75x75 mm
Flow	≈ 2 l/s	≈ 8 l/s
