

Steel Fiber

Steel fibers for concrete and mortars with very high mechanical resistance.

Steel Fiber is made of steel fibres obtained by cold drawing of high resistance and high carbon content steel wire. Compliant with standard EN 14889-1 on steel fibres for structural use.

1. For certified Geolite FRC systems with Geolite Magma Xenon or Geolite Magma
2. They improve the ductility and mechanical characteristics of high-performance mortars and concrete
3. Excellent adhesion and anchoring
4. Excellent mixing properties and dispersion

Areas of application

- Intended use:
- When mixed with Geolite Magma Xenon or Geolite Magma, they allow for the preparation of Geolite FRC systems: high ductility, ultra-high performance, pourable, fibre-reinforced mortars for the repair and strengthening of reinforced concrete and prestressed reinforced concrete structural and infrastructural elements, by means of low thickness interventions without the use of additional rebars.
 - Creation of low-thickness extrados slabs on any type of floor.
 - Creation of low-thickness “jackets” on reinforced concrete and prestressed reinforced concrete structures such as beams, pillars, nodes, walls and foundations.
 - Repair of structural elements and floorings.

Instructions for use

- Preparation
- Steel Fiber are ready-to-use.
- Application
- Steel Fiber are added to concrete and mortars directly on site.
- A ready-to-cast mortar is prepared pouring the powder into the cement mixer and adding mixing water as indicated in the technical data sheet.
- Once the ready-to-use mix is obtained, slowly add the fibres in the chosen amount and mix in order to ensure perfect distribution of Steel Fiber in the binder matrix.
- When using with Geolite Magma Xenon or Geolite Magma, mix Steel Fiber in the amount of 6.5 % of the weight of the powder (1 packaging every 4 bags).

Certificates and marks

Technical Data compliant with Kerakoll Quality Standard				
Shape		shiny straight rigid fibres		
Nature of material		cold drawn steel with a high carbon content		
Density of the material	ρ_f	7.85 g/cm³	EN 14889	
Fibre length	l_f	13 mm	EN 14889	
Fibre diameter	d_f	0.20 mm	EN 14889	
Form ratio		65	EN 14889	
Shelf life		unlimited		
Pack		6.5 kg boxes		
Number of fibres per kg		≈ 314.000		
Recommended dosage*		1 packaging of Steel Fiber every 4 bags of Geolite Magma Xenon or Geolite Magma	(6.5% of the weight of the powder)	

* for dosing with other types of mortar, carry out the appropriate checks

Performance			
HIGH-TECH			
Tensile strength	f_{ft}	$\geq 3100 \text{ MPa}$	EN 14889
Elastic modulus	E_f	$\geq 200 \text{ GPa}$	EN 14889
Elongation at break	A_{ft}	$> 1\%$	EN 14889

Warning

- Product for professional use

→ abide by any standards and national regulations

→ when handling the material wear protective clothing and goggles, and follow the instructions regarding methods for applying the material

→ storage on the work site: store under cover in a dry place, well away from substances that might damage it or its ability to adhere to the chosen matrix
- the product is an item according to the definitions of the EC Regulation No. 1907/2006 and therefore does not require a Safety Data Sheet

→ for any other issues, contact Kerakoll Technical Customer Service:
